Are You Maximizing the Full Value of Your Simulation Center?

SELF-ASSESSMENT

Streamlining your sim center management can help you get the most out of your simulation efforts and maximize learning impact. Use this assessment to identify areas of your lab that may benefit from increased efficiencies. Plus, discover ways that SimCapture can assist you in these areas. **Check "Yes" for any statement that applies to your organization. Checked boxes indicate areas in your simulation program that may benefit from increased efficiencies.**

Managing Data on Learner Performance and Progress

	Not an issue	Yes
Learner performance data is often collected manually using paper-based systems or multiple spreadsheets.		
It can be difficult to see how individual learners are progressing.		
It can be challenging to identify learning issues or trends happening on the cohort level.		

Streamline it with SimCapture: SimCapture collects objective data on your learners' performance and organizes it into insights that help you identify issues, tweak teaching strategies, and verify competence.

Collecting and Managing Data on Sim Center Utilization

	Not an issue	Yes
It's difficult to measure the number of learners and visitors coming through the lab.		
It's challenging to keep track of the number of sessions we're conducting.		
It can be a challenge to track how much and how often our equipment is utilized.		
We often lack the evidence we need to demonstrate ROI to the administration.		
It's a challenge to gather all the data needed for accreditation.		

Streamline it with SimCapture: SimCapture helps you collect essential utilization data to facilitate accreditation and/or demonstrate the value of your simulation investments.

Inventory Management

	Not an issue	Yes
We spend a significant amount of time managing inventory manually.		
We sometimes experience interruptions due to miscounted supplies.		
It's difficult to plan/budget for inventory ahead of time.		

Streamline it with SimCapture: SimCapture automatically tracks your capital and consumable inventory, helping you plan for current and future needs more easily.

Administrative Workload

		Not an issue	Yes
Faculty spend a lot of time transferring learner performance data from our simulation management system to our learning management system (LMS).		*Not an issue*	Yes
Administrative tasks sometimes detract from instructional time.		*Not an issue*	Yes

Streamline it with SimCapture: *SimCapture integrates with most learning management system (LMS) platforms to automate data transfer. This can reduce administrative burden and free up time for impactful teaching.*

Simulation Location Flexibility

		Not an issue	Yes
Equipment constraints limit our ability to run simulations outside the lab.		*Not an issue*	Yes
It's sometimes difficult to capture all the footage we need at the right angles to facilitate reflective learning.		*Not an issue*	Yes

Streamline it with SimCapture: *The SimCapture Mobile Camera app allows you to run simulations anywhere, using a mobile phone or tablet, without losing the simulation management functionality you'd have in the lab.*

Collaboration

		Not an issue	Yes
Collaborating on scenario development is a manual process (sharing files back and forth via email, etc.)		*Not an issue*	Yes
It can be challenging to easily share learner performance information with other educators.		*Not an issue*	Yes

Streamline it with SimCapture: *SimCapture allows you to collaborate on scenario development and easily share learner information with other educators.*

Skills Training Approach

		Not an issue	Yes
Faculty spend a lot of time on direct learner oversight during skills practice.		*Not an issue*	Yes
The organization lacks enough educators to support effective skills training.		*Not an issue*	Yes
We wish we could offer more opportunities for deliberate skills practice.		*Not an issue*	Yes

Streamline it with SimCapture: *SimCapture for Skills facilitates peer-to-peer learning with immediate feedback and automated performance tracking. This can reduce educator workload while boosting learning outcomes.*

SimCapture can help you increase efficiency and maximize the value of simulation.
