

Essentials of Debriefing

This two-hour virtual *Essentials of Debriefing* training is intended for simulation staff who will be debriefing learners and need an introduction to, or a refresher on, debriefing concepts and best practices. The training includes educational theories that influence and inform the use of reflective learning techniques, such as debriefing.

This training does not focus on any specific simulator models or control systems.

Upon full participation and completion of this virtual training, participants will be able to:

- Explain why debriefing is necessary
- Describe debriefing best-practices and “worst-practices”
- Outline components common across multiple debriefing methodologies
- Facilitate a debriefing session

Live Online Training Agenda:

What is debriefing -----	15 minutes
How does debriefing contribute to learning -----	15 minutes
Learner decisions and debriefing -----	20 minutes
When to debrief -----	10 minutes
General debriefing principles -----	20 minutes
Closing thoughts and Q&A-----	15 minutes

Educational Representative Responsibility:

Your Laerdal Educator has multiple responsibilities during the virtual training:

- Help you understand Laerdal resources.
- Conduct an interactive agenda to optimize your understanding of the debriefing and facilitate the development of your proficiency.
- Illustrate techniques to help improve your simulations.
