SimCapture

Your Next Step in Simulation Management

Is your current simulation management system limiting your program's potential? Many programs find themselves juggling disconnected tools, rigid workflows, and increasing demands on their faculty and staff. SimCapture offers a more seamless, reliable, and future ready experience, giving your team a clear, supported path to simplify operations, strengthen performance, and unlock the full potential of your simulation program.

What You Can Expect with SimCapture

- **Experience a guided transition:** Our Education and Support teams bring hands-on expertise and a proven commitment to helping every customer achieve a smooth, successful onboarding experience.
- **Benefit from a cloud-based platform built for today's needs:** SimCapture Cloud reduces complexity, streamlines simulation workflows, and supports efficient, scalable operations—whether you're running a single lab or managing a multisite program.
- **Grow with flexible, future-ready capabilities:** From skills development to OSCEs, SimCapture provides the scalability and adaptability your program needs. We're continuing to enhance the platform with AI-supported workflows, deeper integrations, and mobile solutions to help you do even more.
- **Gain expert guidance from a dedicated Impact Manager:** Every SimCapture subscription includes access to Laerdal's specialized Impact Manager team. With deep simulation knowledge and clinical experience, they help remove operational hurdles, increase utilization, and ensure programs get maximum value from SimCapture.

LIMITED TIME OFFER

If you are currently using an eligible competitive system, you may qualify for a limited time offer designed to reduce the upfront investment as you transition to SimCapture Cloud.

Your SimCapture Specialist will:

- Review your current workflows
- Recommend the right configuration for your program
- Walk you through the promotional details

Offer valid January–December 31, 2026 in the US and Canada.
