

Simulating delivery? Facts your learners may want to know.

Would your learners be surprised to know?

5X The rate of opioid withdrawal among newborns in the U.S. has multiplied by 5 in the past decade.⁴

Low frequency, high-acuity

700

women die each year in the U.S. due to pregnancy & delivery complications.⁷

Nearly **4,000,000** women give birth each year in the U.S. & an estimated 50,000 women are affected by life-threatening delivery complications.⁸

of women do not receive prenatal care in the first trimester.⁹

That's **1,000,000** women not receiving guidance for a healthy lifestyle and pregnancy.

Prepare for the worst. Simulate obstetric emergencies.

Over **60%** of pregnancy-related deaths in the U.S. are preventable.¹⁰

Practice for the most common complications:¹¹

Hemorrhage

Infection

Heart Disease

Delivery-related complications account for

\$17.4 BILLION or nearly

5% of hospital costs in the U.S.¹²

of traditional clinical experience can be substituted with simulation, according to a study by the National Council of State Boards of Nursing (NCSBN).¹³
