2023

CALENDAR COMPETITION
CUSTOMER EDITION

The Laerdal Customer Calendar competition has returned for 2023 by popular demand. We invited our user network to vote for their favourite entry from a selection of fantastic snaps submitted by customers across Australia and New Zealand. The most popular entry is featured on the prestigious cover page. 2nd and 3rd placegetters are also highlighted.

July 'his is how we roll!

December

Thank you.

**Laerdal would like to thank everyone
who submitted entries to the 2023 competition.**

As you can see, we have some very creative and talented people out there – all demonstrating the impact that the training has had on promoting patient safety. It was tough to choose the final selection!

We would also like to thank all our customers for their support of the calendar.

We hope you enjoy this year's edition.

MARCH

Image submitted by: Chisholm Institute

"Multiverse theory suggests that our universe, with all its hundreds of billions of galaxies and almost countless stars, spanning tens of billions of light-years, may not be the only one. In the snapshot of this Universe the Cigarettes our patient started smoking to impress her love interest lead to Lung Disease rather than her flying off in a convertible with her love interest. Now our patient must undergo an EBUS procedure and thankfully Dr. Zuko knows how important patient safety is by keeping his patient well informed and being there for her admission journey."

Laerdal Global Health

Every year, 40 million women give birth without a skilled birth attendant. Despite progress, maternal and child mortality rates are still unacceptably high around the world — especially on the day of birth — which accounts for over 20 percent of deaths of children under the age of five.

Manage, Assess & Debrief

For learning to be efficient, educational objectives must be clearly defined and training must have a measurable, positive impact on learners' clinical practice. Make the most of your training with tools to help you provide effective management, assessment, and debriefing.
