# How Can Your Organization Benefit from a Simulation Escape Room?

*Many organizations have found escape rooms highly beneficial. If you check the boxes next to most of these statements, you may want to explore the use of an escape room to make learning stick.*

LEARNER  
ENGAGEMENT

LEARNER  
RETENTION

CLINICAL  
KNOWLEDGE

LEADERSHIP  
SKILLS

PATIENT  
OUTCOMES

## LEARNER ENGAGEMENT

I've seen how game-based learning leads to deeper learner and faculty engagement with the curriculum.

My students would enjoy how simulation escape rooms keep the learning tempo going.

I think it's helpful to put learners in a setting where they can't give up and are encouraged to collectively brainstorm with their teammates.

## LEARNER RETENTION

I struggle with learner engagement and how to make the interaction with clinical concepts more fun.

I've seen how learners are more likely to retain information when they enjoy the learning process.

I've seen how learners can pass their exams but still not be able to recall the information when they are faced with a real patient situation.

# How Can Your Organization Benefit from a Simulation Escape Room?

## CLINICAL KNOWLEDGE

I am seeking new ways to create a human connection to the subject matter at hand.

I am seeking new but non-threatening ways to achieve a quick assessment of a learner's understanding of information.

I value a low-stakes, high-impact learning experience reinforces the importance of curriculum topics in a safe environment.

---

## LEADERSHIP SKILLS

I need to create an environment in which select learners will emerge as leaders and help to assign roles and responsibilities to others.

I need to create an environment in which learners improve in their ability to work as a team and delegate tasks.

I want to test critical-thinking and decision-making skills as they work through the puzzle pieces.

I need a simulation model that rewards strong team behaviors.

---

## PATIENT OUTCOMES

I need to create situations where learners can emerge with the increased confidence to apply patient safety concepts to their future work.

Our organization places a premium on providers being able to think clearly, quickly, and decisively can translate to better patient satisfaction and reduced patient harm.

*This list highlights the most frequently cited benefits of a simulation escape room. As escape rooms can vary greatly, depending on the approach, size, and structure, the results can also vary.*
